CULINARY HERITAGE ARCHITECTURE

The Complete Digital Ordering & Operations Solution with Zero Intermediary Commissions

Your comprehensive walkthrough to exploring the Resto ecosystem: customer mobile app experience, an intelligent delivery driver portal, and a centralized web dashboard for kitchen and revenue control.

3	0%	100%
Synchronized Apps	Aggregator Commission	Operations Control

Three Intelligent User Experiences .. Functioning as One Cohesive Entity

Engineered to give restaurant operators total mastery over digital sales channels and daily fulfillment:

1. Digital Channel Ownership & Zero Commission

Instead of giving away 15% to 25% commission on every order to third-party delivery apps, Resto grants you a 100% direct digital ordering channel under your brand identity.

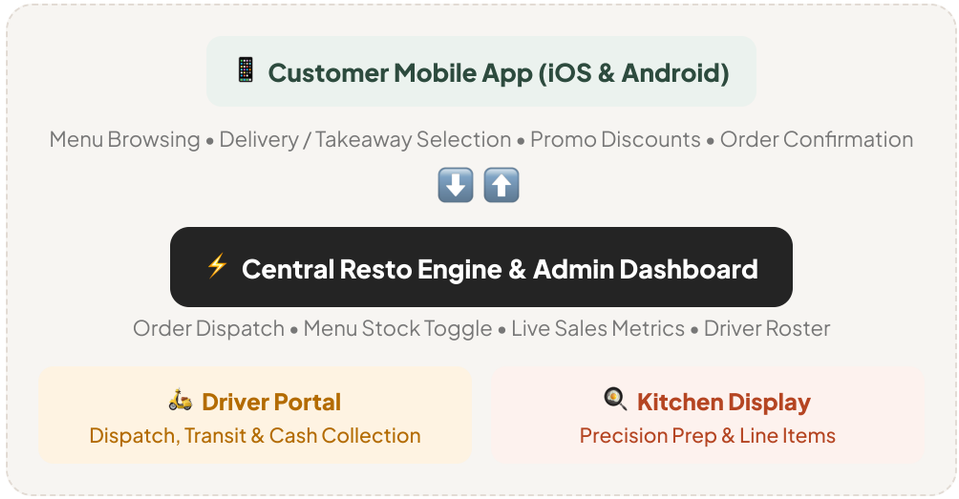

2. Operational Fluidity & Real-Time Sync

The instant a guest places an order, it appears in the kitchen queue on the admin console, enabling 1-click driver dispatch without disruptive phone coordination.

3. Customer Data Ownership & Loyalty

Retain full ownership of customer profiles, contact numbers, and order histories to deliver targeted weekly promotional coupons that encourage high-margin reorders.

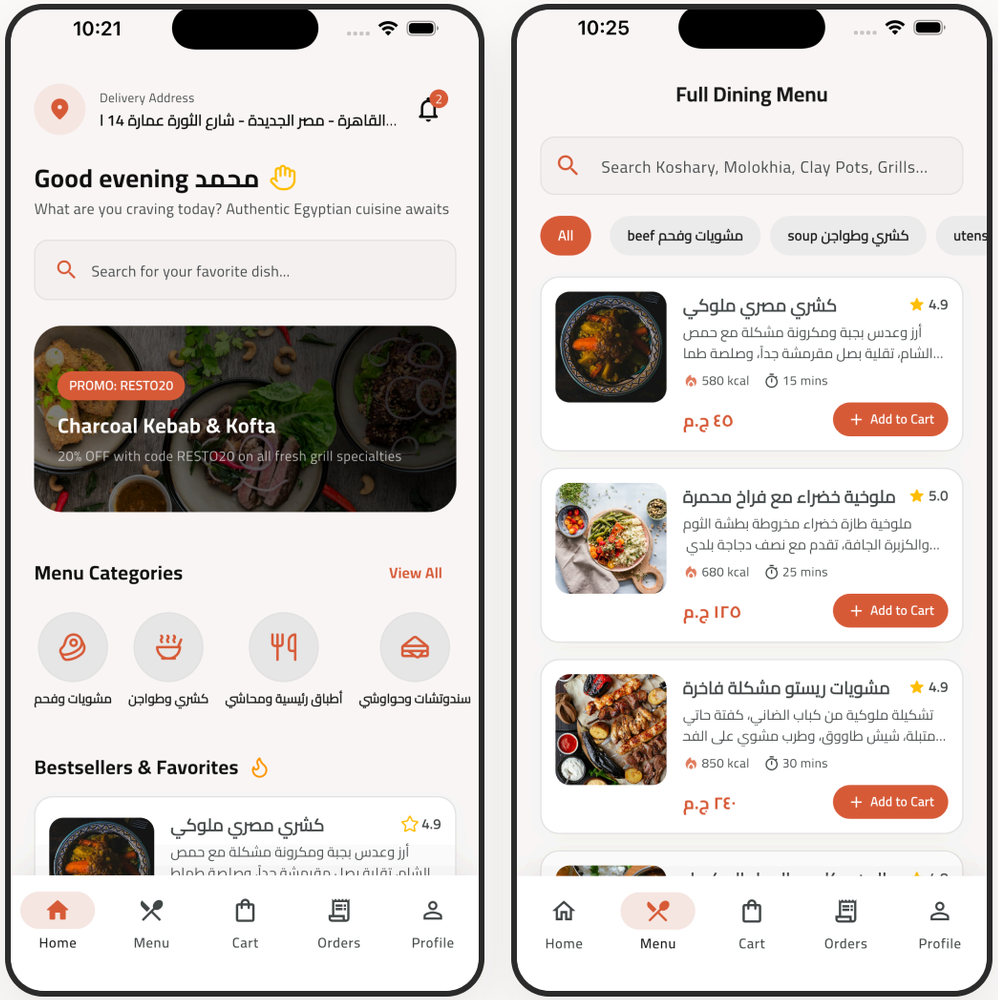

Ecosystem Architecture Flow

Every interaction is synchronized reactively across devices in sub-seconds without delay.

A Visual, Appetite-Driven Digital Menu That Drives High-Value Orders

An immersive browsing experience taking guests on an appetizing journey across your menu:

Smart Categorization & Dish Classification

Clear categories tailored to authentic dining (Charcoal Grills, Clay Pots & Tajines, Traditional Specialties, Sandwiches & Hawawshi) with expressive iconography for effortless browsing in seconds.

Calorie Transparency & Estimated Prep Times

Professional presentation for each dish, including calculated calories (e.g. 580 kcal), expected preparation duration (e.g. 15 mins), and item ingredients to build guest trust.

Instant Search & Promotional Hero Banners

Rapid search across dishes and ingredients, paired with a dynamic promotional top banner advertising weekly coupon codes (RESTO20) to maximize shopping cart size.

Frictionless Direct Ordering & Transparent Milestone Tracking to the Doorstep

Seamless flexibility between home delivery and takeaway pickup with clear preparation progress:

Flexible Cart & Real-Time Coupon Validation

Easily manage portion quantities, apply promotional discounts (RESTO20) with instant savings applied to the subtotal, and toggle between door-to-door delivery or branch pickup.

Address Details & Cash on Delivery (COD)

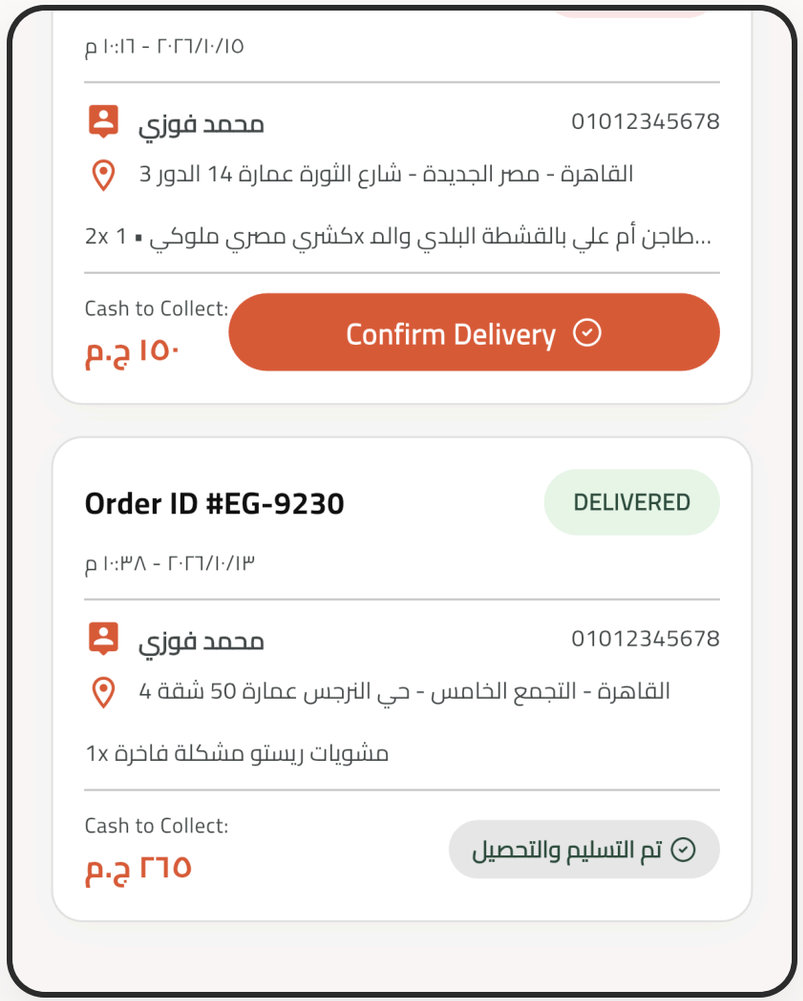

Capture detailed street address, building, floor, and contact phone number with custom notes for the chef or courier (e.g., ring doorbell and leave package) alongside trusted cash payment.

Reliable 4-Stage Milestone Tracking

A clear 4-stage milestone tracker: (Order Received ➔ Cooking in Kitchen ➔ Out with Driver ➔ Delivered Successfully), with courier profile details and direct-call button without battery-draining GPS overhead.

A Lightweight Operational Tool Enabling Couriers to Deliver Swiftly

A functional interface specifically tailored for high-tempo transit with zero operational bottlenecks:

Instant Dispatch **Prioritized Order Queue per Driver**

The courier opens the portal to find orders assigned by kitchen management sorted by preparation readiness, order ID, and delivery urgency.

Clear Details **Pinpoint Address & Exact Cash Due**

Full address breakdown (city, district, street name, building number, floor) with 1-tap customer phone dialing and exact cash collection due in EGP (e.g. 150 EGP).

1-Tap Action **Instant Delivery Confirmation & Status Sync**

A single, clear action button: "Delivered to Customer". Pressing it marks the delivery completed in the admin console and sends an instant completion notification to the guest.

Real-Time Sales Monitoring, Kitchen Queues & Delivery Fleet Oversight

A unified command interface giving restaurant managers a live panoramic view of all branch activity:

Today's Revenue	Total Orders Today	Kitchen Active Queue	Couriers En Route
640 EGP	**3 Orders**	**0 Pending**	**1 Active Driver**
+14% vs yesterday	98% completion rate	Fastest prep: 16 mins	Avg delivery: 32 mins

Instant Order Processing & Live Cooking Stage Updates

An interactive operations table allowing floor managers to inspect order items and dispatch drivers:

Rapid Status Filtering

Instantly switch between (All Orders), (Active Queue), and (Completed Orders) to keep cashiers and kitchen expeditor screens clutter-free.

Detailed Line Items & Guest Info

Displays exact dishes ordered (e.g., Royal Koshary, Mixed Grills, Clay Pot Om Ali) alongside customer phone number, special instructions, and total invoice due.

Quick Action Dispatch

Assign drivers, advance preparation milestones, or confirm completed fulfillment directly from the row without navigating away.

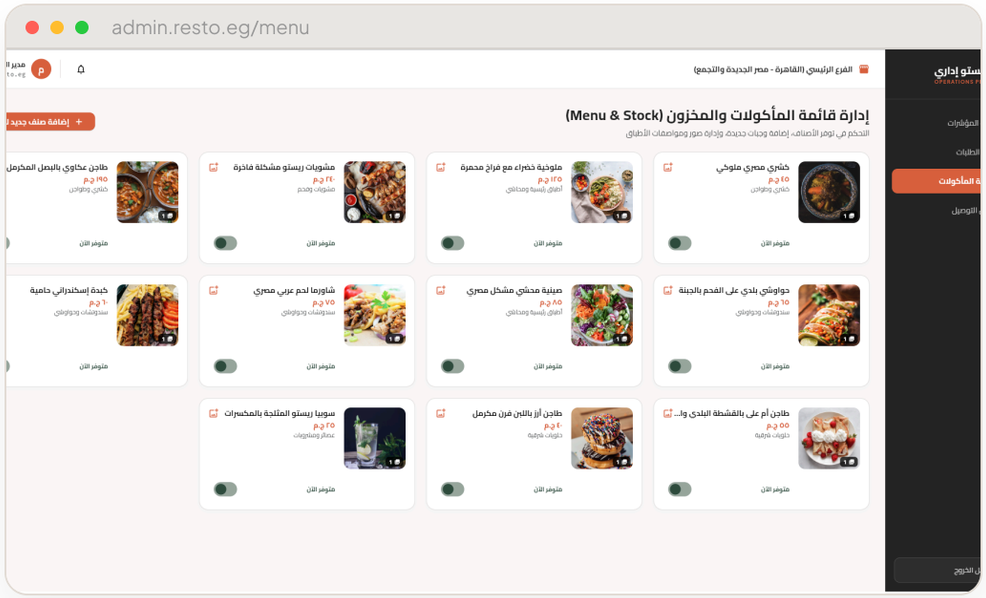

Absolute Agility: Instant Out-of-Stock Toggle & Driver Crew Supervision

Administrative controls safeguarding restaurant reputation by preventing orders of sold-out dishes:

Menu & Stock Availability Control

Real-Time

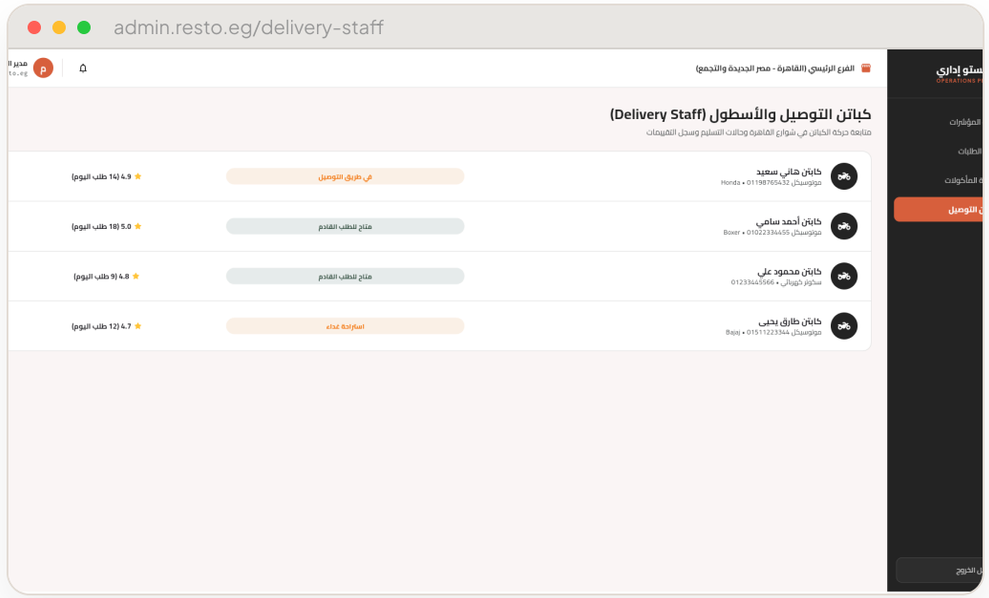

Single-click availability toggle (In Stock / Out of Stock) for each menu dish; disabling an item hides it immediately from the customer app to eliminate guest disappointment.

Delivery Fleet & Couriers (Fleet Roster)

Fleet Tracking

Monitor the status of each courier (Out on Delivery, Available for Next Dispatch, On Break), track customer ratings, and evaluate daily completed delivery counts.

An Integrated Lifecycle Guaranteeing an Exceptional Experience from Screen to Table

Seamless data continuity across customer, kitchen, and courier teams without communication gaps:

Stage 1

Customer Orders & Customizes

Browse dishes, add chef instructions, apply promo discount (RESTO20), and choose home delivery or branch takeaway pickup.

📱 Smart Mobile App

Stage 2

Kitchen Receives & Prepares

Order lands instantly in the kitchen queue, chefs begin food preparation, and an available courier is assigned in 1 click.

💻 Operations Dashboard

Stage 3

Driver En Route to Address

Courier collects freshly packed food, checks address and contact, and switches status to "Out for Delivery" to notify the customer.

🛵 Courier Delivery Portal

Stage 4

Delivery, Feedback & Reorder

Safe delivery, cash collection, in-app star rating, and effortless 1-click reordering for future cravings.

⭐ Customer Loyalty & Retention

Integrated Complaints & Suggestions Center

A direct communication channel to handle customer inquiries promptly and protect brand reputation.

Dish Ratings · 1-Click Reorder

Ready to Witness the Resto Ecosystem Powering Your Restaurant?

Experience the platform live in your browser right now via our interactive demo sandbox. Test ordering as a guest, receiving the order in the kitchen, and delivering as a driver.
